ERRATUM TO “ASYMPTOTICS OF $q$-PLANCHEREL MEASURES”

VALENTIN FÉRAY AND PIERRE-LOÏC MÉLIOT

Erratum

Contrary to what is claimed in Section 5.3 of the paper, the density of polynomials in $\mathcal{C}^1([-1, 1])$ is not sufficient to prove the convergence of $D_{n,q}(f_i)$ for continuously differentiable functions $f_i$. Therefore we can only prove the fluctuations of polynomial functions evaluated on random Young diagrams distributed with $\mathcal{M}_{n,q}$ and not the fluctuations of the rows themselves. The fluctuation of the rows, as stated in Theorem 2, was proved afterward by Alexey Bufetov by another method, see A. Bufetov. A central limit theorem for extremal characters of the infinite symmetric group. Funkt. Anal. Appl., 46(2):83–93, 2012.
